

Custom Wrapping Paper Enquiry

For custom flat sheets used to wrap burgers or sandwiches. Complete what you know; photos and approximate measurements are enough to start. Use one form for each specification, or attach a size and artwork breakdown.

Your food and order

Contact and project

Company, contact name, reply email and project reference.

Food and wrapping method

Burger or sandwich; whole or cut; full wrap, partial wrap or liner. Add photo references.

Food dimensions or current wrapper

Finished food length x width x height; sheet width x length if known. Include mm or inches, or write help needed.

Food contact and service

Packing temperature, oil, sauce, moisture and time before eating. Mention any intended reheating.

Quantity by size and design

Estimated sheets per size and artwork version. If undecided, give your approximate total.

Delivery destination and timing

Country, city or postal code, and preferred arrival date. State any split deliveries.

What would you like to improve

For example, exposed ends, excess paper, staining or a hidden logo. Existing photos can explain the issue.

Start with a photo if the dimensions are undecided. Final sheet size, paper and price are confirmed for your project. Paper-product MOQ guidance starts at 10,000 pieces; the quotation confirms the quantity for each specification.

Fill only what you know. For longer answers, attach an extra page. Save a copy before sending.

Send the form and reference files to lynn@aurovopack.com

Custom Wrapping Paper Enquiry

Add the details available now. Keep the sample and final-order fields for later if you are starting a new project.

Print and sample details

Artwork and visible branding

File name or link, revision, colors, repeat pattern or fixed logo. Mark the visible panel after folding.

Paper preference and documents

Existing paper reference or preferred appearance, if known. List destination-market or food-contact documents required.

Packing and replenishment

Preferred sheets per inner pack, pack identification and counter or dispenser needs. Leave undecided items open.

Reference files to share

Food and wrap photos, current sheet, artwork or relevant specifications. List files or links; send attachments separately.

Sample checks to resolve

Coverage and fold, oil or moisture behavior, visible print, outer-pack fit and opening. Note your most important check.

Sample feedback when available

Sample reference, food and holding conditions, result and requested changes. This can be completed later.

Record for the final order

After agreement: sheet dimensions, paper reference, artwork revision, quantity split and packing. Keep the approved sample reference.

Sample checks come after the first discussion; they are not a condition for enquiring. Use an existing food wrapper or an appropriate supplier sample for food-contact trials. Oven, microwave or grill use needs a separate suitability review.

Fill only what you know. For longer answers, attach an extra page. Save a copy before sending.
